

## ICU 2004 Allegro Design Entry CIS Issues

1. Title: 'Drawing Interconnects still abhorrently poor and troublesome'

Description : 'Start of wire disappears after turning a corner. This also applies to adding bus entries. End point attachment intermittently successful. '

2. Title: '"Part Value" field like in "Other"'

Description : 'Return to " Create Allegro Netlist " dialog "Part Value" field like in "Other"  
Currently netlister create device value only from combined string and mostly it include illegal chars that crash the logic import in Allegro. '

3. Title: 'Heirarchy in ORCAD is inept'

Description : 'Currently in ORCAD CIS there is no way to manage your heirarchy. The only way to view the page of the heirarchy are to open the schematic design with the heirachy on it. Where you don t get the correct board reference designators. Plotting is also a nightmare.'

4. Title: 'Add constaint Manager to ORCAD Capture'

Description : 'Please ADD constraint manager to the tool'

5. Title: 'Issues with plotting hierarchical schematics'

Description : 'Issues with plotting hierarchical schematics Plotting hierarchical schematics that use reuses modules is very difficult error prone and frustrating. Especially when the same reuse module is used more than once in a design. This issue has been reported before but nothing seems to have been done. This causes significant problems for us debugging boards. Please fix this bug. '
